Title Dynamic Graphical Analysis Of Network Data

Declaration and Power of Attorney

We, Richard Alan Becker, Stephen G. Eick, Eileen O. Miller and Allan R. Wilks, declare

That we are citizens of the United States of America, United States of America, United States of America and Canada, respectively and residents of Warren, Somerset County, Naperville, DuPage County, Short Hills, Essex County, and Scotch Plains, Union County, and the State of New Jersey, Illinois, New Jersey and New Jersey, respectively, that we verily believe ourselves to be the original and joint inventors of the invention described and claims in Letters Patent No. 5,136,690 and in the attached specification and for which invention we solicit a reissue patent, and that we do not know and do not believe that said invention was ever known or used in the United States of America before our invention thereof;

That we believe that the Letters Patent No. 5,136,690 herewith surrendered, are partly inoperative or invalid as a result of our claiming more or less than we had a right to claim. Specifically, the claims are insufficient in that they do not include claims such as claims 33 through 38 of the present reissue application.

That the above-described insufficiency was discovered by coinventor, Stephen G. Eick, in connection with a review of the aforementioned patent.

That to adequately protect the invention, claims 33 through 38 should be added as indicated in the reissue application.

That the application for reissue of our patent is being filed as soon as the same could be done after the discovery of the insufficiencies of said patent and that upon the discovery of these facts, steps were taken to prepare the application for reissue.

That all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity

of the application or any patent issuing thereon.
